Derating curve

- Note**
- All parameters are measured at 230VAC input, rated load at 25°C of ambient temp. if not special mentioned
 - Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1μF & 47μF parallel capacitor.
 - Tolerance: includes set up tolerance, line regulation and load regulation.
 - Line regulation is measured from low voltage to high voltage at rated load
 - Load regulation is measured from 0% to 100% rated load
 - According to the requirements of GB4943.1, the power supply is only used under altitude of 2000M and non-tropical climates
